7 MAY 1969

MEMORANDUM FOR: Chief, Employees Activity Branch

25X1A9a

ATTENTION :

SUBJECT : Suggestion Award #69-223
transmittal dated 18 February 1969

1. We believe the cost breakdown of this suggestion to be unrealistic and the production problems greatly oversimplified. We will not attempt to try to compare the costs to our present methods, however, as we feel that this should be done by the Office of Communications.

2. We do see serious physical security problems should such a system be adopted. They would include, but not be limited to, secure studios, tape transfer and storage, and emergency destruction facilities for tape libraries. None of these problems are insurmountable but should be considered when evaluating the referenced suggestion.

25X1A9a

Chief, Physical Security Division
